

THE UNSELFISH GENOME- HOW DARWIN & DAWKINS MISSED THE 2ND HALF OF THE THEORY OF EVOLUTION: NEW RESEARCH IDENTIFIES THE HORMONE CHANGES THAT CONTROL HUMAN AGING

Fun To Read!- Written in an easy to understand and at times humorous style for normal readers and scientists alike. MANY Shocking Conclusions about the Freak Show of Evolution's Unexplained Oddities One chapter includes a detailed examination of how various human hormones change with aging, and how the "good" hormones decline with age, and how the "bad" hormones intentionally designed by evolution to kill you, skyrocket after age 50. (also included are ways to reverse this...

Reader's Opinions

A very good update on the theory of evolution. A good try to fill in the gaps of evolution theory by the author. Gives the new way to rethink the evolution of species on the planet.

Best-selling author and personal friend Jeff Bowles has a new book about aging out. Before recapping the book's premise, I'd like to put out a disclaimer-I am not familiar with the specifics of evolution, the selfish gene...
